YSF Newsletter - July 2018

Topics:

1. Message from YSF's Spokesperson
2. New board members
3. Update on YSF activities @ EBS2018 Maastricht
4. Getting connected to YSF

1. Message from YSF's Spokesperson

Dear ESB member,

It is my pleasure to announce some exciting upcoming events, including the YSF workshops organized at the ESB conference in Maastricht.

Sandra
SPOKESPERSON

In addition to our conventional workshop for a large audience, we will also host a small-scale interactive writing session in collaboration with Dr. Neil Hammond, from Royal Society of Chemistry. The places are free of charge for ESB delegates who are registered for the conference, but the number of spots is limited. We particularly encourage early-stage PhD students to take part in this unique opportunity!

Furthermore, I am also proud to present our new elected YSF team. Welcome on board to the new team members Elena Varoni, David Barata, Liliana Teixeira, Nicola Contessi and Arn Mignon.

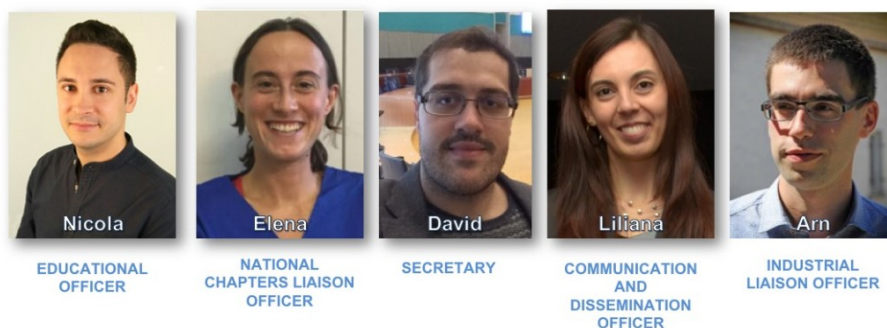

We continue to stay at your service and look forward to continue to welcome you at our YSF activities in the future.

Kind regards,

Sandra Van Vlierberghe

2. New board members

Following the electoral process earlier this year, the new roles for the YSF board have been assigned. Five young motivated scientists are joining the YSF board. Take a chance to get to know them below, and feel free to contact them to support your local activities. The new members are Nicola Contessi (Educational Officer), Elena Varoni (National Chapters Liaison Officer), David Barata (Secretary), Liliana Teixeira (Communication and Dissemination Officer) and Arn Mignon (Industrial Liaison Officer).

Find more details on our motivation at YSF-ESB website. Updated contacts for National Chapters will be soon available. All the details can be found here in [this link](#).

3. Update on YSF activities @ ESB2018

The ESB 2018 Maastricht conference is getting closer and some YSF activities are already planned for its members to ensure they gain the best experience while being at this meeting. On Sep 9 we will host an [interactive workshop](#) focused on educational affairs. On Sep 10 the YSF general assembly will take place. On Sep 11, we will organize the session. An interactive guide to good science writing, while in the

evening, we have our [YSF's Night Out](#), which includes a social evening with dinner, music and networking opportunities at an incredible venue by the Maas river.

Find more details [on the website](#). Feel free to contact the [local organizing committee](#) in case of questions. They are working hard to organize an exciting event.

4. Getting connected to YSF

We are trying to reach you more efficiently in order to be able to share useful information related to YSF / ESB with all of you. We're convinced this will strengthen our network and bring more academic and professional opportunities to our members. Our most recent communication tools focus on e-mailing (new format for the Newsletter), an updated website and social media (Twitter and LinkedIn).

Take advantage of all our connectivity tools to improve your network, to keep updated about important matters related to the Biomaterials fields and the important professional developmental opportunities for young scientists.
